## About Execu/Tech

Execu/Tech began in December, 1981. We are a software development company specializing in hotel, restaurant point of sale, and real estate property management software. All of our software products are developed, maintained, and supported in-house by our own highly skilled and dedicated staff.

Companies such as *Princess Tours, Sodexo Marriott, Saturn Corporation, Pleasant Hawaiian Holidays, Homestead Villages, Best Western, Masters Inns*, and so many others have successfully installed HOTEL Property Management and/or Execu/Touch Point of Sale software.

The diversity of our users testifies to the power and flexibility of Execu/Tech software and services, as well as our understanding of the unique demands of the hospitality industry.

## Execu/Care Support

Customer support is such a high priority at Execu/Tech that we gave it a special name — **Execu/Care**. We think the name reflects the attitude we have toward each and every customer. We care about their success. Their success is our success.

The majority of incidents from **Execu/Care** customers are resolved immediately. We use real people to answer your calls and have technicians on staff 24 hours a day, 7 days a week

# ExecuTouch

## Point Of Sale Software

### "The Power of One!"

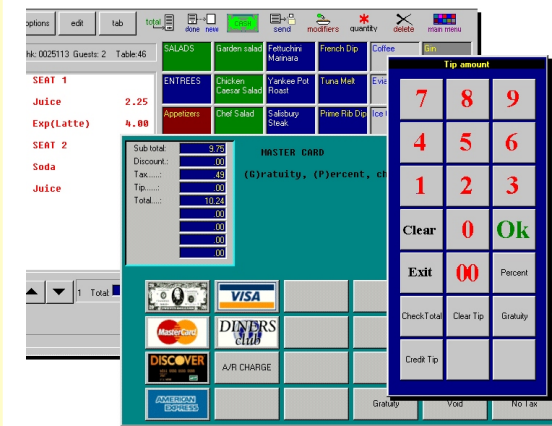

One solution for complete business management. Execu/Touch incorporates an intuitive point of sale system with a comprehensive back office package.

Your restaurants, shops, inventory, and back office accounting all work together to provide you with the vital information needed to manage your business.

- Windows Touch Screen Point of Sale
- Fine Dining (Table / Seat Selection)
- Fast Food / Quick Service / Cafeteria (Combo / Value Meals, Drive-Through Terminals, Customer Accounts Receivable)
- Retail (Barcode Scanning)
- Handheld Wireless Operation

**HOTEL™**  
The Power of One!

# Why Choose Execu/Touch?

An automated point of sale system offers many benefits over a manual system of sales. The initial investment is quickly recovered as your business operates more efficiently. Your wait staff will have more time for your customers, your kitchen will receive orders immediately, and your managers will have instant access to detailed reporting on daily sales, sales history, employee performance, and a wealth of other information.

## Cost Effective

The Execu/Touch system architecture is designed for business operation. Execu/Touch operates on all Windows platforms, Novell, Linux, and Unix. Execu/Touch does not require proprietary hardware.

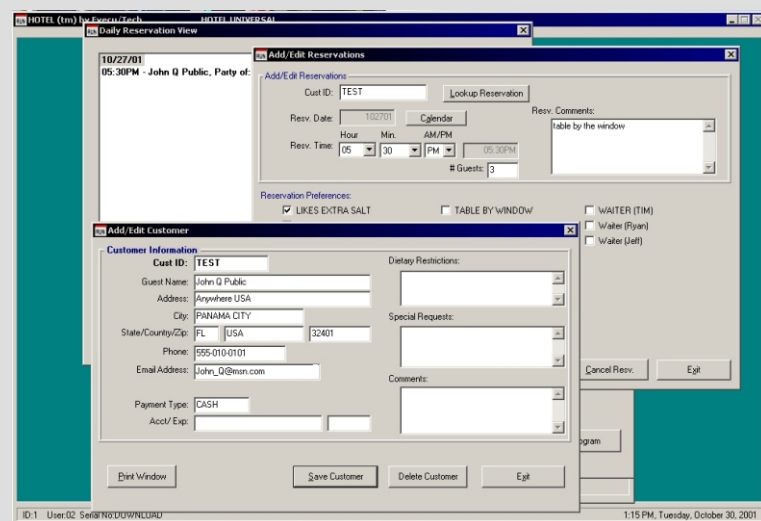

## Secure

Execu/Touch gives you control over user access in the software. Built-in multi-level security allows you to monitor all employee transactions in the system.

## Table Reservations

**Execu/Touch Reservations** is an integrated scheduling and table management solution to compliment your Execu/Touch Software.

Customer information, reservation history, and customizable preferences are accessible from the Execu/Touch software.

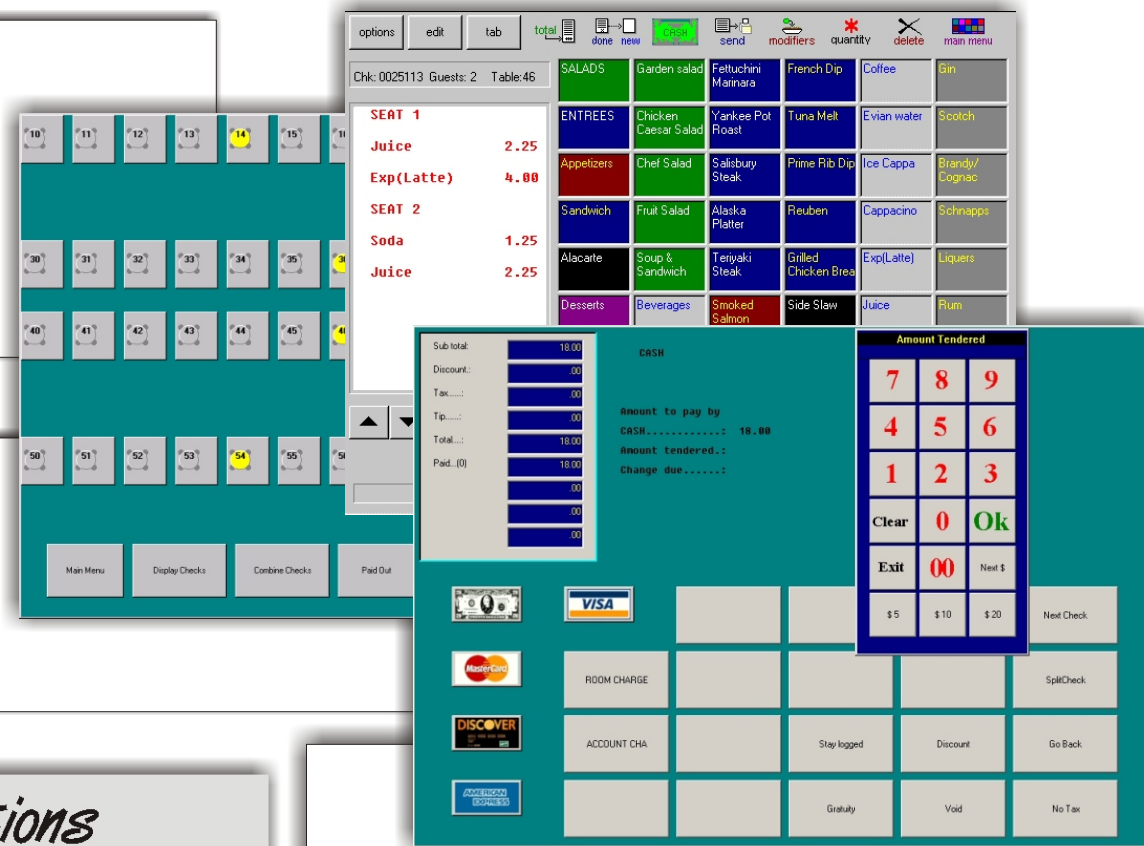

## Scalable

Execu/Touch is ideal for single user installations and powerful enough to support multiple stores locally and in multiple locations.

Execu/Touch offers several modes of operation:

- Fine Dining
- Fast Food / Quick Service
- Cafeteria
- Retail

You may use Execu/Touch in one mode or set up multiple stores to run any combination of the above modes to fit your property's needs.

## Reporting

A host of easy to run reports gives you information about purchases, sales, employees, and profits. You may export sales, labor, and inventory data into Excel, Access, Lotus, etc.

- Each check can be reprinted for up to one full year
- All reports can be re-printed for one full year
- Cash drawer balancing and sales analysis by menu / shift / cashier / register / hour / and day
- Detailed void reporting by employee / supervisor / item
- Sales and tip reporting by server
- Sales analysis and usage by inventory item / department
- Unlimited sales history
- Employee time reporting
- All reports may be printed by date or date range

## Features

Five user security levels; administrator, supervisor, cashier, server, and non-pos

- Password security
- Administration (menu changes, employee permissions, etc.) from remote location with "on the fly" update to each terminal's database
- Easy "One Button" close-out at the end of day
- "Auto Login" and "Quick Key" modes for bar, retail, and fast foods
- Completely user-defined items, modifiers, departments, discounts, tax setup
- Up to 54 item buttons visible at one time on the Graphical Touch Screen, 108 item buttons available by using the "second screen" option
- Buttons can be assigned as menu categories, item or modifier "hot" keys
- Up to 1300 items per menu per outlet in food and beverage, unlimited in retail
- Up to 600 modifiers per menu per outlet
- Up to 99 registers per store
- Up to 99 stores per system
- Up to 8 menus per outlet (breakfast, lunch, dinner, happy hour, etc.)
- Unlimited "86" list
- Split / combine checks

- Two currencies can print on guest check
- "Offline" operation if server goes down
- Printer redirection
- Club Membership with Online Credit Check
- Meal plans with Online Verification
- Optional interfaces to popular Accounting and Inventory Software- QuickBooks™, Restaurant Magic™, Food Trak™, Great Plains Accounting™. Sales data may be imported to Microsoft Access™ or other popular Databases automatically as part of End of Day.

## Labor & Cash Control

With Execu/Touch you are no longer at the mercy of outsiders. You control costs by controlling the Execu/Touch system. You spend less time doing bookkeeping functions and more time servicing your customers. Integrated Time & Attendance gives you on the spot labor vs. sales reports.

## Inventory Control

This complete inventory system allows you to create and track stock items from creation of purchase orders, through receipt of stock, to sales to the guests.

Inventory is updated automatically-

- Retail - directly using SKU's via barcode scanning
- Food & Beverage - via Execu/Touch's 'Recipe'
